

IVANS LIME™ Broadband

Fast Access and Better Visibility into Your Medicare Cash Flow

As a healthcare provider, you need easy access to Medicare claims data to ensure you bill the right services and receive accurate payment in a timely manner. The challenge is finding a solution that combines speed, simplicity and a guaranteed connection to the right Medicare payer, every time.

IVANS understands that having visibility and control over your Medicare revenue is more important than ever. As an approved solution of the Centers for Medicare and Medicaid Services (CMS), IVANS LIME Broadband provides a fast, easy-to-use connection directly to Medicare's systems – helping you increase cash flow, reduce operating costs and lower payment risk.

The IVANS Solution

IVANS LIME Broadband is a high-speed, Medicare access solution that leverages your existing Internet connection to provide secure, direct access to Medicare's systems. Whether you need to conduct transactions for Medicare Part A, Part B, Home Health & Hospice, Durable Medical Equipment (DME), or Section 1011, you can connect to all of your Medicare contractors with IVANS LIME.

IVANS LIME Broadband is paired with IVANS Portal, an easy-to-use, secure web interface that links you to the entire Medicare claims workflow: patient eligibility verification, claims submission, claims status request, claims correction, claims confirmation, and electronic

remittance advice. You can conduct individual or multiple (batch) Medicare transactions from this one application, and the solution easily supports one to many users for a predictable monthly fee, with no major technology investment.

IVANS LIME Broadband is built on a highly-reliable network infrastructure and is backed by our knowledgeable customer support team, ready to answer questions via phone, live chat or email. With IVANS LIME Broadband, you have easy access to the information you need to manage your Medicare business.

Accelerated Access to the Entire CMS Workflow

Service Features

- **Easy-to-use web application** – Providing a single, integrated access point to conduct the wide range of Medicare transactions online
- **Fast CMS access** – Leveraging broadband Internet to process Medicare claims up to ten times faster than older dial-up technologies
- **Comprehensive claims workflow support** – Linking you to the complete Medicare claims workflow and multiple Medicare contractors
- **Single or multi-user support** – Providing CMS access for one or multiple users in your organization with no major technology investment
- **Secure connectivity** – Delivering CMS-approved connectivity in accordance with Medicare’s secure data exchange requirements
- **Knowledgeable customer support** – Including assistance via phone, live chat and email with your questions regarding CMS applications, billing and accessing CMS throughout the day

“With IVANS, I now know when claims go out, what their status is and when they get paid. It’s given me much greater control over my cash flow, and has made the Medicare billing process much easier.”

*Henry Fofang
Administrator
GentleCare Home Health*

Key Benefits

- **Easier claims management** – By accelerating claims workflow and connecting you to the range of Medicare transactions through a single solution
- **Improved bottom line** – By helping you streamline transaction processing and speed payment for Medicare services
- **Reduced risk** – By providing greater visibility into beneficiary eligibility and claims status to ensure you are reimbursed for the services you provide

Stress-Free Solutions

At IVANS, we understand your daily challenge to process claims and get paid in a timely fashion. IVANS LIME Broadband makes Medicare claims management easier by providing fast access and better visibility into your Medicare workflow – so you have more control over your Medicare business.
